

Name(s):

Topic:

ADSC2030 Project Report Grading Rubric				
Category	4	3	2	1
Understanding and Description of Experiment and Data	Establishes excellent understanding of data structure and organization. Variables are adequately described. Proper numerical and graphical tools are presented in the report. Presents tables and figures that are clear and accurate.	Establishes good understanding of data structure and organization. Good level of detail about the data. Proper numerical and graphical tools are tried and used to describe variables. Presents tables and figures that are mostly clear and accurate.	Fair understanding of data structure and organization. Limited information about the data in the report. Numerical and graphical tools are incomplete presented in the report. Presents tables and figures that lack clarity.	Limited understanding of data structure and organization. Limited detail about the data in the report. Numerical and graphical tools are incomplete and do not adequately describe the variables. Presents tables and figures that lack clarity.
Design Objectives	Clearly answers questions using the most appropriate methods. Addresses data collected from multiple designs.	Answers research questions using appropriate methods. Only data from one design are examined.	Answers research questions using somewhat appropriate methods. Only data from one design are examined.	One or more research questions are not addressed using appropriate methods. Only data from one design are examined.
Analysis and Interpretation	Provides excellent understanding of statistical inference. Formulae and calculations are clear and accurate.	Provides good understanding of statistical inference. Formulae and calculations are mostly clear and accurate.	Provides some understanding of statistical inference but lacks clear explanation. Formulae and calculations lack clarity.	Provides limited understanding of statistical inference. Formulae and calculations lack clarity.
Communication of Results	Displays highly informative organization and presentation in reporting data. Conclusions are valid with enough evidence and are based on the results presented.	Displays informative organization and presentation in reporting data. Conclusions are valid with some reference to evidence and are based on the results presented.	Displays adequate organization and presentation in reporting data. Conclusions are limited with some evidence and somewhat deviate from the result presented.	Displays limited organization and presentation in reporting data. Conclusions are limited with no links to evidence and deviate from the results presented.
Creativity	Shows a lot of creative thought in addressing the topic, displaying data and results, and data issues.	Shows some creative thought in addressing the topic, displaying data and results, and data issues.	Shows very little creative thought in addressing the topic, displaying data and results, and data issues.	Shows no creative thought in addressing the topic, displaying data and results, and data issues.
Clarity	Report is extremely professional, clean, and free of any spelling or grammatical errors. Contents are all directly related to the project objective(s).	Report is very professional, clean, and is mostly free of spelling or grammatical errors. Contents are generally directly related to the project objective(s).	Report is not very professional or clean. It has many spelling and/or grammatical errors. Contents are generally not directly related to the project objective(s).	The report is very messy and completely lacks clarity. Contents are not related to the project objective(s).
